### **Conflict of interest management policy**

In order to identify, prevent, manage and monitor conflicts of interest that result from delegations, the management company has implemented a conflict of interest management policy available on request from your usual advisor or on the management company's website: [www.groupama-am.com](http://www.groupama-am.com).

## **3 MANAGEMENT AND OPERATING PRINCIPLES**

### **3.1 General characteristics**

#### **Characteristics of units:**

- Type of right attached to the unit class:  
Each unitholder has a shared ownership right in the Fund's assets in proportion to the number of units held.
- Shareholder register and fund accounting:  
Fund accounting is provided by the custodian.  
Unit administration is performed by Euroclear France.
- Voting rights:  
No voting rights are attached to the units, as decisions are made by the management company.
- Types of units:  
Units are registered and/or bearer units.
- Fractioning:  
Units may be subscribed in exact amounts or in ten-thousandths of a unit for the I, N and R unit classes.  
Units may be subscribed in exact amounts or in thousandths of a unit for the MC, MU, MUH, MSH, M2, V, G and O unit classes.  
Units may be subscribed or redeemed in exact amounts or in ten-thousandths of a unit for the I, N and R unit

classes.

Units may be subscribed or redeemed in exact amounts or in thousandths of a unit for the MC, MU, V, G MSH, MUH, M2 and O unit classes.

The total redemption of units will only be possible as a quantity and not as an amount.

**Financial year end:**

- The last Paris stock exchange trading day in February.
- The first financial year ended on the last Paris stock exchange trading day in September 1995.

**Tax system:**

- The Fund is eligible for PEA (personal equity savings plans) for individual investors.
- The Fund is not subject to corporation tax. In accordance with the principle of transparency, the tax authorities consider the shareholder to be the direct owner of a proportion of the financial instruments and cash held in the Fund.
- The tax treatment of any capital gains or income from holding Fund units depends on the tax provisions specific to the unitholder's own particular circumstances and/or on the tax provisions in the country where the unitholder resides. We recommend that you seek advice on this subject from your tax adviser.
- The French tax system considers a switch from one unit class to another unit class to be a sale subject to capital gains tax.

**Classification:**

“Eurozone equities” UCITS Investment in UCIs: up to 10% of the net assets.

**SFDR classification:**

This UCITS is a financial product that promotes environmental or social characteristics, or a combination of these characteristics, in accordance with Article 8 of the SFDR.

**Investment objective:**

The Fund's investment objective is to outperform its benchmark, the MSCI EMU Small Cap (closing), with net dividends reinvested, after deduction of management fees.

This objective will be implemented via a managerial approach that promotes the sustainability of issuers through an

analysis of the ESG (environmental, social and governance) characteristics of the securities held in the portfolio.

### **Benchmark index:**

The benchmark is the MSCI EMU Small Cap index (closing), with net dividends reinvested.

The MSCI EMU Small Cap Index, with net dividends reinvested, is published by Morgan Stanley Capital International and represents small and medium-capitalisation listed companies in the eurozone that meet appropriate liquidity criteria. It is a sub-index of the MSCI EMU. The index is calculated by weighting each security (approximately 250) by its market capitalisation (public float only). It is expressed in euros with dividends reinvested.

This index is only a reference. No mechanism to maintain any level of correlation with it is in place as part of the managerial approach implemented. Nevertheless, the behavioural profile of the portfolio and the index may be comparable in certain market configurations.

MSCI DEUTSCHLAND GmbH, the administrator (“the Administrator”) of the MSCI EMU Small Cap (closing) Benchmark Index, with net dividends reinvested, has obtained authorisation and is therefore included in the register of administrators and benchmark indices held by ESMA.

The Administrator will make information on its indices available to the public on its website, <https://www.msci.com/indexes>.

Groupama Asset Management has an internal action plan which will be implemented in the event of substantial modification or termination of the Index.

### **Investment strategy:**

#### ► Portfolio composition strategy:

The investment strategy implemented is based on financial and non-financial convictions regarding a portfolio made up of companies selected in a fundamental, discretionary manner.

To achieve its investment objective, the management of the Fund is based on a process made up of four major phases:

- Generation of investment ideas;
- Analysis of securities;
- Valuation of securities;
- Investment decision.

The investment process is based on a pure stock-picking approach only, i.e. the identification, analysis and selection of companies deemed capable of creating value over the medium/long term thanks to their positioning in growth markets. No consideration is paid to the macroeconomic context, or the beta, and there is no predefined allocation strategy; this selection is based only on companies’ ability to create value for their shareholders over the medium/long term.

It concentrates on an in-depth financial analysis of companies: validation of the industrial model with management, modelling and medium-term valuation of the value-creation potential. Once the securities have been selected and incorporated into the portfolio, the process focuses on monitoring the companies’ proper execution of their industrial strategies and their value creation, with a view to long-term success.

The management approach aims to implement:

1. An investment process that prioritises stock-picking and is based on:
  - The weighting given to company visits and analysis within the process
  - The use of an internal valuation model

2. A conviction-based management approach, based on:
  - A high-conviction portfolio
  - Selected economic models deemed to have potential
  - Consistency in the choice of securities

Integration of ESG criteria:

Since a sustainable and responsible investment (SRI) UCITS is involved, the extra-financial analysis applied to the UCITS takes into account criteria relating to each environmental, social and governance factor. The Fund seeks to select the highest rated issuers within the investment universe, based on extra-financial criteria (best-in-universe approach).

The management process uses a best-in-universe ESG approach, which is detailed in the ESG annex of the prospectus.

- Assets, excluding embedded derivatives

▮ Equity markets:

In terms of portfolio management, eurozone equities represent at least 75% of the Fund's net assets. However, the manager may invest up to 10% of the net assets in markets outside the eurozone.

The minimum exposure to equity risk is 75% of the Fund's net assets.

The investment universe comprises equities of small- and mid-cap companies. The manager reserves the right to invest in large-cap companies. The relative weighting of small- and mid-cap companies versus large-cap companies is not fixed but remains predominant, varying according to market opportunities.

▮ Bond market:

The Fund may only invest in interest rate products through UCIs, up to a maximum of 10% of its net assets.

▮ Holding shares or units of other foreign UCITS, AIFs or investment funds:

The Fund may invest up to 10% of its net assets in units or shares of UCIs.

The UCIs may be those managed directly or indirectly by Groupama Asset Management.

External UCIs will be subject to a close review of their management procedures, performance, risk, and any other qualitative or quantitative criteria that allow the quality of management to be assessed in the short, medium or long term.

Up to 10% of the net assets may be invested in trackers (listed index entities).

- Derivative instruments and securities with embedded derivatives

The use of derivatives and securities with embedded derivatives is authorised subject to a maximum commitment of 20% of the Fund's net assets and therefore has an impact both on the Fund's performance and its level of risk. However, these make it possible to create exposure to or hedge against a specific risk, and in that respect they increase the strategy's flexibility. Derivatives are therefore used to maximise performance. The strategy for the use of securities with embedded derivatives is the same as that described for derivatives.

The manager may trade in the derivatives and securities with embedded derivatives described in the following table:

▸ Selection criteria for counterparties

Counterparties on over-the-counter instruments (over-the-counter derivatives and effective portfolio management techniques) are selected through a specific procedure applied within the management company; the main selection criteria relate to their financial strength, their expertise on the types of transactions envisaged, the general contractual clauses and the specific clauses relating to counterparty risk mitigation techniques.

• Deposits:

Up to 10% of the Fund's net assets may be in the form of deposits at a credit institution based in a Member State of the European Union or the European Economic Area, with a term of less than 12 months, as a store

of cash to be used as needed.

- **Cash borrowings:**

On an exceptional basis, with the aim of investing in anticipation of a market rise or on a more temporary basis in connection with managing large redemptions, the manager may borrow cash up to the value of 10% of the Fund's net assets from the custodian.

- **Temporary purchases and sales of securities:**

The Fund does not anticipate the use of leveraging as a structural approach. The lending and borrowing of securities and repurchase agreements are also not envisaged. From time to time, equity exposure may slightly exceed 100% of the net assets and create a negative cash position. This type of unusual situation will be short-lived and direct equity exposure will not exceed 130% of the net assets.

Since the UCITS fund may use derivatives and securities with embedded derivatives and have access to cash borrowings, the portfolio's total level of exposure will not exceed 200% of the net assets.

Further information is given in the "Charges and fees" section.

### **Information relating to the Fund's collateral:**

The GROUPAMA AVENIR EURO UCITS complies with the investment rules for financial collateral that are applicable to UCITS and does not apply specific criteria in addition to these rules.

The Fund may receive securities (such as corporate bonds and/or government bonds) or cash in the context of derivatives transactions traded over the counter. The collateral received and its diversification will comply with the restrictions of the Fund/UCITS.

Only the cash collateral received will be reused, via reinvestment in accordance with the rules applicable to UCITS.

All of these assets received as collateral must be issued by high-quality, liquid, diversified issuers with low volatility that are not an entity of the counterparty or its group.

These assets received as collateral will be retained by the custodian of the UCITS on specific accounts. Management of margin calls will be undertaken on a daily basis.

The discounts applied to collateral received take into account the credit quality, the price volatility of the securities and the result of stress tests carried out in accordance with the regulatory provisions.

**The level of financial guarantees and the discount policy are determined in accordance with the regulations in force.**

### **Risk profile:**

- **Risk of capital loss:**

Investors will be exposed to the risk of not recovering the full amount of the capital they invest, since the Fund does not offer a capital guarantee.

- **Equity risk:**

The principal risk to which investors are exposed is equity risk, as a minimum of 75% of the Fund is invested in equities. The Fund's net asset value is highly likely to experience fluctuations comparable to those seen in its preferred investment universe, that of listed equities from the eurozone.

The value of an investment and the income derived from it may go up as well as down, and investors may not recover the capital initially invested in the company. A portfolio's value may be affected by external factors such as political and economic developments or political changes in certain governments.

- **Risk linked to investments in small and mid-caps:**

On these markets, the volume of securities listed on a stock exchange is reduced and movements on the market are therefore more dramatic and occur more quickly than on the markets of large-cap companies.

Unitholders are reminded that the Fund may be exposed to small and mid-cap equity markets that may, by their nature, be subject to significant movements, both upwards and downwards. As such, the Fund's net

asset value could fall.

- Use of derivatives:

The use of derivatives may increase or decrease the Fund's volatility by respectively increasing or decreasing its exposure.

However, this should remain relatively close to its benchmark index, even if it may vary from time to time.

- Liquidity risk:

Some of the Fund's assets may prove to be illiquid, causing a potentially long delay between the date that an order is placed and the date of its execution. During this delay, the value of the instruments may fall significantly, which could entail a drop in the value of the Fund.

- Exchange rate risk:

The exchange rate risk is related to the Fund's exposure, via its investments and through its trades in forward financial instruments, in a currency other than that of the Fund's valuation.

The exchange rate risk related to investments is less than 10% of the net assets.

#### For MU units (denominated in USD)

These units are exposed to exchange rate risk, given that they are denominated in a different currency to that of the benchmark index. Consequently, the net asset value of this unit class may decrease, despite an appreciation of the value of the benchmark index, due to fluctuations in exchange rates.

#### For MUH and MSH units

For such units denominated in a currency other than the euro, the exchange rate risk related to fluctuations in the euro against the valuation currency is residual, due to the use of systematic hedging. This hedging may lead to a performance gap between units in different currencies.

MUH units (denominated in USD) and MSH units (denominated in CHF) will be systematically hedged against exchange rate risk.

All units have the same investment portfolio, and MUH and MSH units are also hedged against the exchange rate risk between the Swiss franc, the US dollar and the euro.

- Credit risk:

This is the potential risk that the credit rating of public or private issuers may fall, which will negatively impact the price of the security, and thus the Fund's net asset value.

In the event of default or a deterioration in the credit ratings of issuers not anticipated by the markets, e.g. the downgrading of their rating by financial rating agencies, the value of the bonds in which the Fund is invested will fall, causing the Fund's net asset value to drop.

- Interest rate risk:

Unitholders are exposed to interest rate risk because of the Fund's investments in bond UCIs. Interest rate risk is the risk that bond market interest rates may rise, which would cause bond prices to fall and, consequently, the Fund's net asset value to fall. Exposure to interest rate risk will not exceed 10% of the Fund's net assets.

- Counterparty risk:

Counterparty risk relates to the conclusion of over-the-counter futures. It consists of assessing the risks for an entity in terms of its commitments with respect to the counterparty with which the contract has been concluded. It therefore refers to the risk that a counterparty may default, causing it to default on payment. In accordance with the regulations, this risk may not exceed 10% of the net assets per counterparty.

- **Sustainability risks:**

Sustainability risks are taken into account during decision-making as follows:

- **Major ESG Risks list:** this list comprises companies whose ESG risks could call into question their economic and financial viability, or could have a significant impact on the company's value and brand, thus resulting in a significant fall in market value or a significant downgrade by rating agencies. The securities comprising this list are excluded from the UCITS.
- **Fossil fuel policy:** the purpose of this policy is to reduce the exposure of the Fund to climate risks, whether these be physical risks or transitional risks. In order to limit these risks, a stock exclusion list has been defined according to specific and regularly reviewed criteria. These securities are subject to exclusion or non-reinvestment as detailed in our Fossil fuel policy.
- **Controversial weapons exclusion policy:** this policy applies to companies involved in the production, marketing or distribution of controversial weapons. These stocks cannot be invested in.

There may be several impacts resulting from the emergence of a sustainability risk and they may vary depending on the specific risk, region and asset class. In general, when a sustainability risk occurs for an asset, it will cause a negative impact on the asset or a total loss in its value.

- **Management policy for liquidity risk:**

Management of the Fund's liquidity risk is undertaken as part of an analysis and monitoring procedure that relies on internal tools and methodologies in place within Groupama Asset Management.

This procedure has two main components:

- monitoring the portfolio's liquidity profile based on an asset liquidity assessment in view of current market conditions, and
- monitoring the Fund's ability, whether in current or worsening market conditions, to deal with significant redemption scenarios.

GROUPAMA AVENIR EURO is aimed at investors seeking to enhance their savings via equity markets in eurozone countries. Investors wish to adopt an aggressive approach through equity investment.

The recommended investment period is more than five years.

Proportion suitable for investment in the Fund: any investment in equities may be subject to significant fluctuations. The amount that might reasonably be invested in the GROUPAMA AVENIR EURO mutual fund should be determined with reference to the investor's personal situation. To determine this, investors should take into consideration their personal wealth, their needs at the present time and over the next five years and the level of risk they are willing to accept.

Investors are also advised to diversify their investments sufficiently to avoid being exposed exclusively to the risks of the Fund.

Investment diversification: this should be achieved by investing in different classes of assets (money market instruments, bonds and equities) and in specific sectors and different geographic regions so as to spread risks more effectively and optimise portfolio management by taking market trends into account.

**Income calculation and appropriation methods:**

This UCITS is a multi-class fund:

- I, N, MC, MU, MUH, MSH, M2, OS, OA and R units: accumulation.

Clearing of subscription orders before 11:00 am (1)	Clearing of redemption orders before 11:00 am (1)	Execution of the order no later than D	Publication of the net asset value	Settlement of subscriptions	Settlement of redemptions

(1) Unless you have agreed a specific deadline with your financial institution.

Subscriptions and redemptions are cleared by CACEIS Bank and may be received every bank business day up to 11.00 a.m.:

- with CACEIS Bank, for bearer or administered registered units,
- with CACEIS Bank Luxembourg Branch for bearer or administered registered units and for clientèle for whom it ensures custody account-keeping,
- with Groupama Asset Management for pure registered units.

They are executed on an unknown net asset value basis with settlement on D+2 Euronext Paris.

Investors are reminded that when sending instructions to distributors other than the institutions indicated above, they must take account of the fact that the cut-off time for clearing imposed by CACEIS Bank applies to these distributors. Consequently, these distributors may stipulate their own earlier cut-off time, which may precede the cut-off time mentioned above so that instructions can be sent to CACEIS Bank on time.

The Fund's net asset value is calculated on every trading day, except on official French public holidays. The reference calendar is that of the Paris stock exchange.

The net asset value may be obtained from: the offices of Groupama Asset Management.

Units may be subscribed in exact amounts or in ten-thousandths of a unit for the I, N and R unit classes.

Units may be subscribed in exact amounts or in thousandths of a unit for the MC, MU, MUH, MSH, M2, V, G, OS and OA unit classes.

Units may be subscribed or redeemed in exact amounts or in ten-thousandths of a unit for the I, N and R unit classes.

Units may be subscribed or redeemed in exact amounts or in thousandths of a unit for the MC, MU, MUH, MSH, M2, V, G, OS and OA unit classes.

- Minimum initial subscription:
  - ▶ I unit: €150,000.
  - ▶ N and R units: €500
  - ▶ MC, MU, MUH, MSH and M2 units: one thousandth of a unit.

- ▶ V unit: €15,000,000.
- ▶ G unit: €300,000.
- ▶ OS and OA units: one thousandth of a unit.

Swing pricing mechanism:

Groupama Asset Management has chosen to implement a swing pricing mechanism pursuant to the procedures recommended by the AFG Charter to protect the UCITS and its long-term investors from the effects of strong inflows or outflows of capital.

If the net amount of subscription or redemption in the UCITS exceeds a threshold previously set by Groupama Asset Management, the net asset value of the UCITS will be increased or reduced by a percentage intended to offset the costs incurred by the investment or disinvestment of this amount and to ensure that these costs are not charged to the other investors in the UCITS.

The triggering threshold and the extent of the swing of the net asset value are specific to the UCITS and are audited quarterly by a “Swing Price” committee. This committee may change the parameters of the swing pricing mechanism at any time, particularly in the event of a crisis on the financial markets.

Provision of redemption caps or “gates”:

Groupama Asset Management may implement the so-called “gates” to allow redemption requests from UCITS unitholders to be spread over several net asset values if they exceed a certain level, determined objectively.

- Description of the method used:

- UCITS unitholders are reminded that the threshold for triggering gates corresponds to the relationship between:
- the difference recorded, on a single clearing date, between the number of UCITS units the redemption of which is requested, or the total amount of these redemptions and the number of UCITS units the subscription of which is requested, or the total amount of these subscriptions; and
  - the net assets or the total number of UCITS units.

If the UCITS has several unit classes, the triggering threshold of the procedure will be the same for all UCITS unit classes.

The threshold above which the gates may be triggered is justified by the frequency at which the net asset value of the UCITS is calculated, its management orientation and the liquidity of the assets it holds. This is set at 5% of the net assets of the UCITS and applies to redemptions received for the UCITS’ assets and not specifically to the UCITS’ unit classes.

When the redemption requests exceed the threshold for triggering gates, Groupama Asset Management may decide to honour redemption requests beyond the expected cap, and to execute in part or in full those orders that might be blocked.

The maximum duration of the application of the *gates* is fixed at the equivalent of 20 net asset values for 3 months.

- Methods of providing information to unitholders:

In the event the gates system is activated, all UCITS unitholders will be informed by any means, through the website of Groupama Asset Management, [www.groupama-am.com](http://www.groupama-am.com).

UCITS unitholders whose orders have not been executed will be informed as quickly as possible in a specific way.

- Processing of non-executed orders:

Redemption orders will be executed in the same proportions for UCITS unitholders who have requested redemption since the last clearing date. For non-executed orders, these will be automatically carried over to the next net asset value and will not have priority over the new redemption orders placed for execution on the basis of the next net asset value. In any case, redemption orders that are not executed and are automatically carried over may not be revoked by UCITS unitholders.

- Example illustrating the system that has been partially set up:

For example, if the total redemption order of the Fund's units is 10% while the triggering threshold is set at 5% of the net assets, Groupama Asset Management may decide to honour redemption orders up to 7.5% of the net assets (and therefore execute 75% of redemption orders as opposed to 50% if the 5% cap was strictly applied).

#### Charges and fees:

- Subscription and redemption fees:

Subscription and redemption fees increase the subscription price paid by the investor, or reduce the redemption price. Fees paid to the Fund are used to compensate the Fund for the expenses incurred in the investment or divestment of the Fund's assets. The remaining fees accrue to the management company, distributor and so on.

#### I, N, MC, MU, MUH, MSH, M2, V and R units:

Charges borne by the investor, collected at the time of subscription and redemption	Base	Rate scale
Subscription fee not accruing to the Fund	Net asset value x Number of units or shares	Maximum rate: 3.00%
Subscription fee accruing to the Fund	Net asset value x Number of units or shares	None
Redemption fee not accruing to the Fund	Net asset value x Number of units or shares	None
Redemption fee accruing to the Fund	Net asset value x Number of units or shares	None

#### OS, OA and G units:

- Operating and management fees:

These fees include all those charged directly to the Fund, except for transaction charges. Transaction charges include intermediary fees (e.g. brokerage fees and stock market taxes) and the transaction fee, if any, that may be charged, particularly by the custodian and the management company.

The following fees may be charged in addition to the operating and management fees:

- ▶ Performance fees. These reward the management company if the Fund exceeds its objectives. They are therefore charged to the Fund;
- ▶ Transaction fees charged to the Fund;

For more information regarding ongoing charges invoiced to the Fund, please refer to the “Charges” section of the Key Investor Information Document (KIID).

**General principles applicable to UCITS performance fees:**

The performance fee is provisioned on each net asset value calculation date and charged upon calculation of the final NAV (net asset value) for each financial year.

The calculation method used is the “daily variation” model, which seeks to adjust the total provisioned balance when each NAV is calculated, based on the UCITS’ performance vis-à-vis the MSCI EMU Small Cap (closing) index, with net dividends invested, since the previous NAV.

A benchmark asset is determined at each valuation of the UCITS. It represents the UCITS’ assets minus subscription/redemption amounts and valued based on the performance of the benchmark index since the most recent valuation.

Where the UCITS’ valued assets, net of any fees, have outperformed the benchmark asset since the most recent NAV, an amount representing 15% of the difference will be added to the balance provisioned for performance fees. On the contrary, where the benchmark asset outperforms the UCITS’ assets between two NAV calculation dates, a write-back of 15% of the difference will be made. The total provisioned balance cannot be negative, so write-backs are capped at the total value of existing provisions. Nevertheless, a theoretical negative balance will be noted so that future variable fees will only be provisioned once the underperformance recorded has been completely offset.

For redemptions, the portion of the provision for variable management fees corresponding to the number of units redeemed accrues in full to the management company.

In the event that no performance fee has been provisioned by the end of a reference period due to an underperformance vis-à-vis the benchmark index, the reference period will be extended to the following financial year with provision amounts calculated in the same way. Performance fees will therefore only be provisioned in the new financial year if past underperformance has been completely offset.

After five years without a performance fee (overall underperformance over five years), the calculation mechanism no longer takes into account uncompensated underperformance before the five years, as illustrated in the second table below.

Since the only criteria for calculating performance fees is a positive relative performance of the UCITS compared to the benchmark index, it is possible that performance fees may be paid even in the case of negative absolute performance.

- Figure 1: General operation

	Year 1	Year 2	Year 3	Year 4	Year 5
Performance of the Fund units	10%	5%	-7%	6%	3%
Performance of the benchmark index	5%	4%	-3%	4%	0%

Further details about the method for calculating performance fees are available from Groupama Asset Management.

The portfolio's management strategy may benefit from third-party research services borne by the Fund.

The contribution to the AMF will also be borne by the Fund.

Any exceptional legal costs related to the recovery of the Fund's receivables may be added to the fees detailed above.

Income from transactions involving the temporary purchase and sale of securities accrues in full to the UCITS.

Charges, costs and fees in respect of these transactions are charged by the custodian and paid by the UCITS.

Groupama Asset Management does not collect any fee in kind from the intermediaries.

- Selection of intermediaries:

Managers have a list of authorised brokers. A Broker Committee assesses managers' evaluations of brokers and the entire value chain covering analysts, middle office and so on, and to justify the inclusion of new brokers and/or the exclusion of others.

Based on their expertise, each manager reports on the following criteria:

- ▶ Quality of order execution prices,
- ▶ Broker's longevity,
- ▶ Quality of the security cycle/of the middle and back office.

## 7 ASSET VALUATION AND ACCOUNTING RULES

### 7.1 Valuation methods

#### **Securities traded on a French or foreign regulated market, including ETFs**

Securities traded in the eurozone:

=> Last price on the valuation day.

For interest rate products, the management company reserves the right to use consensus prices when these are more representative of the market value.

Foreign securities denominated in currencies other than the euro are translated into euros at the exchange rate in Paris on the valuation day.

Transferable securities for which a price has not been calculated on the valuation day are valued at the last officially published price. Securities for which the price has been adjusted are valued at their probable market value under the responsibility of the Fund's manager or the management company.

#### **UCI shares and securities**

Units or shares of UCIs are valued at their last known net asset value.

#### **Negotiable debt securities**

Negotiable debt securities are valued according to the following rules:

Fixed-rate annual interest treasury bills (BTAN) and fixed-rate treasury bills (BTF) are valued on the basis of the day's prices published by the Banque de France.

Other negotiable debt securities (e.g. negotiable short-term and medium-term securities, bonds issued by financial companies, and bonds issued by specialist financial institutions) are valued:

- on the basis of the actual market traded price;
- in the absence of a meaningful market price, by applying an actuarial method to increase the reference rate by a margin reflecting the intrinsic characteristics of the issuer. If the issuer's situation changes significantly, this margin may be adjusted over the period during which the security is held.

#### **Over the counter transactions**

Transactions agreed on over-the-counter markets and authorised by the regulations applicable to UCIs are valued at their market value.

#### **Futures and options contracts**

Futures contracts on derivatives markets are valued at the day's settlement price. Options on derivatives markets are valued at the day's closing price.

#### **Temporary purchases and sales of securities**

- Temporary purchases of securities

Securities received under repurchase agreements or borrowed securities are entered in the long portfolio under

"Receivables representing securities received under repurchase agreements or borrowed securities" at the amount provided for in the contract, plus interest receivable.

- Temporary sales of securities

Securities sold under repurchase agreements or loaned securities are entered in the portfolio and valued at their current value.

The debt representing the securities transferred under repurchase agreements such as in the case of loaned securities is entered in the short portfolio at the value set in the contract plus accrued interest. On settlement,

the interest received or paid is recognised as income from receivables.

- Collateral and margin calls

Collateral received is valued at the market price (mark-to-market).

Daily fluctuation margins are calculated using the difference between the valuation at market price of the collateral provided and the valuation at market price of collateralised instruments.

**Valuation methods for off-balance sheet commitments:**

Futures contracts are valued at nominal value x quantity x settlement price x (currency).

Options contracts are valued at the equivalent value of the underlying.

Swaps:

Asset-backed or non-asset-backed swaps

Commitment = nominal value + valuation of the fixed-rate leg (if fixed/variable) or the variable-rate leg (if variable/fixed) at the market price.

Other swaps

Commitment = nominal value + market value (if the Fund has adopted a synthetic valuation method).

7.2 Method used to recognise income from fixed-income securities

Accrued interest method.

7.3 Method used to recognise expenses

Transactions are accounted for exclusive of costs.
